Customization view of the Portal

The screenshot displays the 'Customize your view of the Portal' interface. It includes a 'Selected Pages' table with rows for 'My Page', 'PAX', and 'I and S', each with 'Layouts' and 'Portlets' buttons. Below this is an 'Unselected Pages' section stating 'There are currently no unselected pages.' A 'Select Skins' window is open, showing a list of available skins: 'futurism', 'blueinfinity' (highlighted), 'brightlight', '* coologic', and 'lumiereorange'. A 'save' button is at the bottom of the window. A blue callout box points to the 'Select Skins' window with the text: 'Brings you to the Select Skins window'. Another blue callout box points to the 'blueinfinity' skin in the list with the text: 'At least one skin will be available with minimal graphics to reduce bandwidth'.

Customize your view of the Portal

Click to select Skins or Pages for this portal.
Click Layout and Portlets buttons to manage Layout and Portlets for each page.

PAX Request provides users with the option to retrieve data with default parameters.

PAX Quick Request allows users to retrieve passenger information.

Date will default to current date

Capabilities for saving last query parameters are available

The Ad Hoc Report Assistant allows users to create, store, schedule and customize queries for

Passenger with Ad Hoc, PAX Request, and Quick Request

Portlets (cont)

Wildcard searches are available

Default PAX Request Mode

Users can enter WHERE criteria to search for a specific passenger, or can leave blank to search for multiple passengers.

An AND criteria can be added to narrow the search for the passenger or passengers.

Duplicate queries are prevented until parameters are

Default settings allow for a maximum of 24 hours of data to be displayed

User can change default values to constrain their search. A checkbox will be added for Last Known Status.

Available Selection Fields for Passenger Request Portlet
